Stock Albuterol is Critical for Asthma Emergencies at School

4.6 million children with asthma

13.8 million missed school days per year

Primary treatment for an asthma flare = quick-relief albuterol inhalers.

Asthma flares should be treated at the first sign of symptoms – any delay increases risk of hospitalization.

Laws in all 50 states allow students to carry albuterol inhalers at school – but what if their inhaler is lost, forgotten or expired? That’s where stock albuterol comes in.

Currently 23 states including the District of Columbia have laws or guidelines permitting schools to stock emergency supplies of albuterol inhalers and administer to a student experiencing an asthma flare.
